SKILLS

Hard

- JS, TS
- Angular
- React
- HTML, CSS
- Unit testing
- Figma

Soft

- Teamwork
- Flexibility
- Agile, Scrum
- Pair programming
- Eye for design
- Mentoring

I also have experience with Ant Design, Azure, Bootstrap, Confluence, Docker, ESLint, Express, Generative AI tools, GitLab CI, Inkscape, Jira, jQuery, Linux, Materialize, MongoDB, Next.js, Node.js, PostgreSQL, Postman, Python, React, REST services, Responsive design, Robot framework, UI/UX Design, Vector graphics

WORK EXPERIENCE

Evosoft, Budapest — *Frontend Developer*

Apr 2021 - Present

We are working on R&D products in the field of Industrial Automation.

Generali, Budapest — *IBM BPM Developer*

Jul 2020 - Apr 2021

We are optimizing and automating business processes to improve efficiency and reduce costs using IBM BPM platform.

Freelancer, Budapest — *React Developer*

Apr 2020 - Apr 2021

I joined a small group of freelancer developers where I am mainly responsible for implementing client side tasks using React with Typescript.

NNG, Budapest — *Frontend Developer*

Oct 2018 - Mar 2020

My main duties as a part of a 10+ member team were to customize NNG's base navigation software to the needs of the customer, follow up my resolved tasks, and cooperate with the techwriter, the test and the backend team. As many of the tasks were unclear and poorly specified my critical thinking and common sense came in handy in many situations.

Saltech Consulting, Budapest — *Pega Developer, Intern*

Sep 2017 - Apr 2018

I was part of an Agile team which was dedicated to simplify processes, and provide efficient back office operation by implementing up-to-date IT solutions and process automations using Pega platform.

ABOUT ME

I began learning coding because I believe it's a crucial skill for staying ahead in the future. Throughout my journey, I discovered a strong interest in projects involving user interfaces, where I can leverage my creative design skills. Since completing coding school, I have continued to expand my knowledge through online courses, focusing primarily on web development, UI/UX, and frontend development, while also exploring other related areas.

I thrive on accuracy, logical thinking, and maintaining high standards in my work, ensuring efficiency and precision in every project I undertake. I believe that it's my personal responsibility to make my environment a better place in my workplace such as in my private life.

FREETIME ACTIVITIES

- Dogs
- Movies, Books (sci-fi)
- FPV drone
- Table tennis
- Board games

LANGUAGES

Hungarian - Native

English - Intermediate

EDUCATION

Self education, Online

2017 - constantly

As a self taught developer I know the importance of continuous learning and improvement. I always have an ongoing course on one of the online learning platforms such as Udemy, Pluralsight or Scrimba.

Codecool, Budapest — *Junior Developer*

2016 - 2017

Codecool is a one year long coding school where we learn how to learn by ourselves and how to work in a team with the help of mentors and we acquire hard and soft skills equally.

PEER RECOMMENDATIONS

"The best thing about working with Dani is that I could always count on him. He always looks for a good solution, not just a working one even if it takes more time. And he knows how to ask the good questions to understand the problem. He strives for writing good quality code and he's not afraid to ask for help if he gets stuck.
Besides, he has a calm personality and he is trustworthy."

Varga Dávid, Codecool

"Daniel's strongest qualities are his perseverance, commitment and attention to detail. He strives to understand what he is doing and he mingles well with people. A good team player."

Lang Ervin, Saltech Consulting

Thank you for your time
